

Ultra Light MDF

Ultra Light MDF is the ideal product for all those uses where an extremely light weight material is specified.

Advantages

- Extremely light in weight, which means it is easy to handle
- Light color
- Even density profile
- Smooth, flawless surface
- Less wear on machines and tools
- Lower transportation cost
- Easier handling for workforce

All Trupan products offered by Weber Plywood & Lumber comply with emission standards. E-1 low emission boards are also available.

An economical, reliable and renewable resource, fiberboard is a proven performer accepted throughout the building industry. Fiberboard absorbs sound, inhibits water intrusion and slows air infiltration. Weber carries a wide supply of defect-free fiberboard panels with the machinability and finishing characteristics you need for maximum efficiency and quality in your next building project.
