Import Grading Guide

These grades cover the majority of the panels imported into the United States by Weber Plywood & Lumber Co. Other grades or variations of these grades may be available by special order.

B/BB – Single piece face and back. Face nearly clear of defects with a light uniform color. Back allows 5 or 6 color-matched patches which are oval in shape and slightly larger than a quarter. Inner cores are solid birch single piece veneers.

BB/BB – Single piece face and back. Face and back allows 5 or 6 small color-matched patches and some darker mineral streaks. 3 or 4 small tight pin knots may be present. Inner cores are solid birch single piece veneers.

BB/CP – Single piece face and back. The back face is a downgraded BB with unlimited patches and sound knots. Inner cores are solid birch single piece veneers.

BB/C – Single face and back. Face grade is BB, while the back face allows unlimited sound knots and repaired splits. Panel is considered to be sound on one side.

C/C – Patches, open knots and veneer splits allowed. Veneer lap and small core voids permitted. Generally not sanded.

R/B BIRCH (cont'd)	4'x8' & 5'x5'
